

WALT: understand differences and similarities between different animals in the kingdom animalia

## Classification of Living Things

WALT: understand differences and similarities between different animals in the kingdom animalia

## Quick recap

Tell me what you can remember from our work on grouping and classification.

What does 'classification' mean?

Why is it important?

Can you remember how many kingdoms there are?

What are they called?

WALT: understand differences and similarities between different animals in the kingdom animalia

Have a go at answering the first question in your booklet.

**WALT understand differences and similarities between different animal kingdoms**

**What can you remember from our work on grouping and classification? How did you decide to group certain things together?**

WALT: understand differences and similarities between different animals in the kingdom animalia

We are going to watch a video to explain how animals are classified into broad groups.

Pay close attention as you will need to know the information to fill the answers in your booklets.

Watch the video clip and take notes of anything you think is important. Use bullet points if it helps.

WALT: understand differences and similarities between different animals in the kingdom animalia

Now using your notes, can you complete the table? You can play the video again to help you.

Fill in the box below

Living thing	Characteristics
Birds	
Reptiles	
Fish	
Amphibians	
Mammals	

WALT: understand differences and similarities between different animals in the kingdom animalia

Can you explain why dolphins are mammals? Why is it surprising that they fall under this category?

## Plenary

Think about the similarities and differences between the animals on your list. You could discuss this with someone at home or you could create a mind map.
