Dear United Nations,

My name Tilda Huntinggord and I am a Student at Chessmood Junior School, did you know that 58 million girls don't go to school? So please consider, I ~~will be~~ am so despret for you to let all girls ~~go to school~~ around the world to go to school. I am strongly standing up to you to say and fight for girls to that don't go to school.

I think this is absaloutly desgresigul. Like really whats the diffeernce between a boy and a girl? They both have the same rights and everything.

Girls dejently should go to school because imagine all girls growing up not knowing anything. Just because they didn't go to school ~~What~~ what will they do with their life? They can't read or wright and if their children ever were ill the wouldn't know how much medicine to give. Just because they didn't go to school!

They all should be allowed to go to school and make friends, friends will give you happines Without them you will just be with your husband, when you grow up you might not even have one. So then you'll be all lonley.

What will happen if girls grow up with no man They will just be poor because they were not educated! Also, girls would like to have their own money so that they can buy what they want to buy. What they would like to buy not what they want need!

I would so love you to concider this letter. I would be destroyed, even heartbroken if you don't let the poor little girls and boys go to school.

Maby help by spreading the word please this is a life changing opitinity for all those poor children out there. Please this isn't just for me but for them.

Your Sincerely
Tilda Huntinggord
