

Information for introduction

What - Perseverance rover, which will explore Mars

Who - NASA (National Aeronautics and Space Administration).

Where - Mars

When - Launched - 30th July 2020.
Landed 18th February 2021

Why - Perseverance will study the rocks and landscape at the landing site to reveal the area's history - a site that once had the potential to host life.

Remember to also tell the reader that they will need to follow your instructions to make their own Mars Lander.
