## 1. Introduction

### 1.1. *Pupil Premium*

Evidence shows that children from disadvantaged backgrounds

- generally face extra challenges in reaching their potential at school
- often do not perform as well as their peers

The pupil premium grant is designed to allow schools to help disadvantaged pupils by improving their progress and the exam results they achieve.

#### 1.1.1. *Free school meals*

Schools get £1,345 for every primary age pupil, or £955 for every secondary age pupil, who claims free school meals, or who has claimed free school meals in the last 6 years.

#### 1.1.2. *Looked-after and previously looked-after children*

Schools get £2,345 for every pupil who has left local authority care through adoption, a special guardianship order or child arrangements order.

### 1.2. *Purpose of the Pupil Premium Strategy*

The purpose of the strategy is accountability:

- For **parents** to understand our pupil premium strategy
- So **governing bodies** can see evidence-based practice so they can consider the rationale behind all pupil premium-related decisions

It is

- Not intended to be an accounting tool
- Not intended to monitor within-class or within-school attainment gaps
- Not used by DfE to monitor how effectively we are using the pupil premium
- Not used by DfE to allocate future funding
- Only used by Ofsted to help them prepare for their visit and not for any other purpose

### 1.3. An Evidence Based Approach

The school uses a variety of evidence based research to support decision making in identifying strategies to support closing the disadvantaged gap. In particular

- NFER – National Foundation for Educational Research
- EEF – Education Endowment Foundation

Department  
for Education

## What are the most effective ways to support disadvantaged pupils' achievement?

Evidence for  
Excellence in  
Education

Research undertaken by NFER has identified seven building blocks that are common in schools which are more successful in raising disadvantaged pupils' attainment.

**1. Whole-school ethos of attainment for all:** Schools have an ethos of high attainment for all pupils and avoid stereotyping disadvantaged pupils as all facing similar barriers or having less potential to succeed.

**2. Addressing behaviour and attendance:** Schools ensure effective behaviour strategies are in place, respond quickly to poor attendance and provide strong social and emotional support, including through working with families.

**3. High quality teaching for all:** Schools emphasise 'quality teaching first' and provide consistently high standards by setting expectations, monitoring performance and sharing best practice.

**4. Meeting individual learning needs:** Staff identify each pupil's challenges and interests. They seek the best strategies to help each pupil make the next step in his or her learning. Schools provide individual support for specific learning needs and group support for pupils with similar needs.

**5. Deploying staff effectively:** Schools devolve responsibility to frontline staff, use their best teachers to work with pupils who need the most support and train teaching assistants to support pupils' learning.

**6. Data driven and responding to evidence:** Teachers use data to identify pupils' learning needs, review progress every few weeks and address underperformance quickly. They have manageable Assessment for Learning systems, which provide clear feedback for pupils. Schools use evidence to make decisions about their support strategies.

**7. Clear, responsive leadership:** Senior leaders set ever higher aspirations and lead by example. They hold all staff accountable for raising attainment, rather than accepting low aspirations and variable performance. They share their thinking and invest in staff training.

### 1.4. A Tiered Approach

To support our approach to the pupil premium strategy, we use a tiered approach. As a large school, we have capacity to address a wide range of strategies outlined in this strategy. However, current priority strategies for improvement are highlighted in **green** to make these clear.

## A tiered approach to Pupil Premium spending

*Considering a tiered approach to Pupil Premium spending can help schools balance approaches to improving teaching, targeted academic support and wider strategies.*

### 1 Teaching

Spending on improving teaching might include professional development, training and support for early career teachers and recruitment and retention. Ensuring an effective teacher is in front of every class, and that every teacher is supported to keep improving, is the key ingredient of a successful school and should rightly be the top priority for Pupil Premium spending.

### 2 Targeted academic support

Evidence consistently shows the positive impact that targeted academic support can have, including on those who are not making good progress across the spectrum of achievement. Considering how classroom teachers and teaching assistants can provide targeted academic support, including how to link structured one-to-one or small group intervention to classroom teaching, is likely to be a key component of an effective Pupil Premium strategy.

### 3 Wider strategies

Wider strategies relate to the most significant non-academic barriers to success in school, including attendance, behaviour and social and emotional support. While many barriers may be common between schools, it is also likely that the specific features of the community each school serves will affect spending in this category.

## 2. Pupil premium strategy statement

| School Overview             |               |                                  |                         |                               |              |
|-----------------------------|---------------|----------------------------------|-------------------------|-------------------------------|--------------|
| Academic Years              | 2020-21       | Total Pupil Premium budget       | £197,393                | Date of most recent PP review |              |
| Number of pupils            | 611           | Number of pupils eligible for PP | 134 (inc. 10 pp+) (22%) | Date of next review date      | October 2021 |
| Senior Leader Authorisation | Jez Himsworth | Governor Lead                    | Carl Walker             | Publish date                  | April 2021   |

| Current Performance (current data not available due to COVID) |                       |               |               |                             |                         |                             |                         |                |                   |
|---|-----------------------|---------------|---------------|-----------------------------|-------------------------|-----------------------------|-------------------------|----------------|-------------------|
|   | All pupils nationally | Chesswood ARE | Chesswood GDS | Chesswood ARE non-PP pupils | Chesswood ARE PP pupils | Chesswood GDS non-PP pupils | Chesswood GDS PP pupils | Progress Score | Progress Score PP |
| RWM   | 65%                   |               |               |                             |                         |                             |                         |                |                   |
| Reading   | 73%                   |               |               |                             |                         |                             |                         |                |                   |

| Maths   | 79%                   |               |               |                             |                         |                             |                         |                |                   |
| GPS   | 78%                   |               |               |                             |                         |                             |                         |                |                   |

## 3. Barriers to future attainment

| Barriers to future attainment |   |   |
|-------------------------------|---|---|
|                               | Barrier   | Detail  |
| A                             | Attendance                                      | Persistent absence for Pupil Premium is twice as likely (a reduction from 6-7 times more likely) <b>Consistent Trend</b>  |
| B                             | Homework Submission                             | 2x as likely to submit homework less than 'Mostly' a reduction from twice as likely last year, although this is probably a result of reductions of non PP children. 3 times more likely to submit homework never or rarely. <b>Consistent Trend</b>   |
| C                             | Behaviour                                       | Pupil premium children present more than 4X the risk with 'extremely high risk' being almost entirely pupil premium. <b>Consistent Trend</b>  |
| D                             | Friendships                                     | More than twice as likely to have minor+ friendship issues. @ five times more likely to have significant+ issues. <b>Consistent Trend</b>   |
| E                             | SEN   | Twice the proportion of PP children are also SEN compared to non PP children. Securing progress given the secondary issues is then exceptionally challenging. It is therefore the secondary challenges that need to be aligned and addressed to secure a good foundation for progress. <b>Consistent Trend</b>  |
| F                             | Contextual Risk                                 | In excess of 80% of pupil premium children have a high+ contextual risk. This compares with 15% for non PP (there are some underlying data factors that exacerbate this).   |
| G                             | Safeguarding                                    | Safeguarding - @6 times more likely to require some form of external safeguarding. <b>Reducing trend</b>  |
| H                             | Academic Risk                                   | (High+) for pupil premium children is more than double that of non PP <b>Increasing trend</b>   |
| I                             | Embedding Quality First Teaching                | Teaching strategies identified to support all children (but particularly disadvantaged) are not yet fully embedded in practice. Although some CPD has taken place, the impact of COVID on CPD and quality assurance has delayed full implementation. <b>COVID impact on CPD</b>   |
| J                             | Cognitive Load Theory – working memory overload | Typically, disadvantaged pupils have less access to quality resources (books, technology), enriching conversation, life experiences (trips, visits to museums, cultural experiences etc.). This results in schema in the long term memory not being developed, thus increasing load on the working memory which impacts ability to access new learning and engagement. <b>Research evidenced</b>  |
| K                             | COVID 19  | The impact of COVID 19 is significant. National research has stated a range of impact on the COVID Gap (progress for all children due to disruption to learning) at at least – 2 months, with many estimates higher. All studies agree that the impact for disadvantaged has seen a widening of the gap (EEF stating that the work done to close the gap over the previous decade has been reversed).   |
| L                             | Belonging                                       | The relationships in a child or young person's life are very important to their wellbeing and development. In a school setting, this means that their relationships with school staff, and with each other, should be nurtured and supported. For a significant minority of pupils, a sense of belonging is not developed leading to lack of engagement and motivation. For some, this increases their vulnerability to grooming, criminalisation and radicalisation. |

## 4. Desired Outcomes

| Desired Outcomes |   |  |
|------------------|---|--|
| Barrier          | Desired outcomes  | How outcomes will be measured  |
| A                | Reduce persistent absence for PP pupils.<br>Increase attendance overall for PP pupils.  | Attendance data.   |
| B                | Engagement of PP pupils with homework improves, closing the gap on non-pupil premium pupils as a result of the strategies implemented.  | Homework judgements on the termly reports (using consistent judgement guidance).<br>Qualitative evidence case studies the impact of strategies identified. |
| C                | Behaviour of PP pupils improves leading to greater engagement in learning. Reduce the 'extremely high risk' behaviour for PP children (currently 4x more likely than non PP).   | Behaviour judgements on termly reports (using consistent judgement guidance).  |
| D                | The incidence of minor friendship issues for PP children is reduced   | Friendship judgements on termly reports (using consistent judgement guidance).   |
| E                | The secondary challenges for SEN pupils are mitigated against to ensure they do not exacerbate the challenges already faced through SEN.  | SEN and pupil premium quality assurance.   |
| F                | Reduce impact of contextual risk for PP children  | Case studies – pastoral and safeguarding.  |
| G                | Reduce safeguarding risk for PP children. Where safeguarding risks are identified, robust action is taken to mitigate against these.  | Case studies – pastoral and safeguarding.  |
| H                | Increased attainment for pupil premium children – reaching age-related expectations. Closing the gap on non-pupil premium.  | Pupil outcomes.  |
| I                | Embedding of quality first teaching, supported by comprehensive quality assurance and coaching programme. Key Areas of Development – whole school & individual, focus particularly on strategies evidenced to support pupil premium children  | Quality assurance outcomes.  |
| J                | Teaching and learning strategies focus on developing long term memory of core knowledge – especially for pupil premium children, seeking to develop webs of knowledge (schema) on which future learning can be built. Identified strategies are embedded in practice across the school.   | Quality assurance outcomes.  |
| K                | During lockdown, the overwhelming majority of disadvantaged pupils are in school, receiving face-to-face teaching. Catch-up programmes focus on need, prioritising PP children thus seeking to reduce the widening gap between PP and non-PP children as a result of COVID / lockdown. Targeted catch-up intervention accelerates progress. The overwhelming majority of identified pupils attend interventions designed for catch-up. Accelerated progress is made against clear targets set.    | Attendance of disadvantaged pupils during lockdown.<br>Attendance of catch-up programmes.<br>Attainment outcomes.  |
| L                | The overwhelming majority of PP children feel that they belong at Chesswood and take an active role in engaging with school, including wider school opportunities – eg clubs.<br>The overwhelming majority of PP pupils <ul style="list-style-type: none"> <li>attend at least one club (registers)</li> <li>feel they belong at Chesswood and are provided with exciting and positive experiences (pupil voice)</li> <li>attend trips – especially residentials</li> <li>wear uniform</li> </ul> | Pupil voice.<br>Club attendance register.  |

## 5. Planned Strategies and Expenditure

### 5.1. Strategy Overview

#### 5.1.1. Teaching Overview

5.1.2.Targeted Support Overview

**5.1.3. Wider Strategies Overview**

## 5.2. Strategies Detail

### 5.2.1. Teaching

| Strategy               | Barrier | Detail  | Desired Outcome   | Evidence base and rationale   | Ensuring quality implementation  | Lead | Evidence   | Expenditure Considerations  |
|------------------------|---------|---|---|---|--|------|--|---|
| Quality first teaching | H, I, J | Quality first teaching is the number one priority in ensuring pupil premium children progress well and close the gap. The school is committed to an evidence-based research informed approach to teaching and learning. We seek to keep up-to-date with the latest evidence on how best children learn – using organisations such as The Chartered College, EEF, NFER and findings in cognitive science. The teaching and learning policy and quality assurance focus on embedding identified strategies that are shown to have impact. | An effective teacher is in front of every class.<br>There is a positive, whole school approach and drive to improving teaching – acknowledging that all teachers can keep improving.<br>All teachers have an active interest in evidence based research to support their development.<br>Teaching is at least in line with expectations set in 85% of classes. Where support is required, coaching programmes including ‘securing expected outcomes’ resulting in improving practice. | ‘We know from the best available evidence that the most powerful tool we have to combat educational inequality is to support great teaching and learning’ Becky Francis.<br>Good teaching is the most important lever schools have to improve outcomes for disadvantaged pupils. Using the Pupil Premium to improve teaching quality benefits all students and has a particularly positive effect on children eligible for the Pupil Premium. While the Pupil Premium is provided as a different grant from core funding, this financial split shouldn’t create an artificial separation from whole class teaching. <a href="#">EEF</a> . <a href="#">Chartered College</a> . <a href="#">NFER</a><br>We want to ensure the gap in attainment for PP children is closing, targeting them ambitiously to achieve expected standards and exceed wherever that is a possibility. | <ul style="list-style-type: none"> <li>• Clear teaching and learning policy</li> <li>• CPD</li> <li>• Building a culture of research reading in staff - eg article of the week / staff website section sharing research / articles / videos / blogs</li> <li>• Ensuring NQTs build in research reading into their NQT time</li> <li>• Quality assurance including coaching support</li> <li>• Evidence gathering and sharing of exemplary practice</li> <li>• An ethos of attainment for all pupils – high aspirations and expectations for all. An unerring focus on high-quality teaching</li> </ul> | LLT  | Quality Assurance Reports<br><br>KAD (key areas of development) implementation | AHT – curriculum, teaching and learning lead<br><br>Middle leader quality assurance and coaching.<br><br>Staff library. |

| Strategy   | Barrier    | Detail   | Desired Outcome  | Evidence base and rationale  | Ensuring quality implementation   | Lead       | Evidence   | Expenditure Considerations  |
|--|------------|--|--|--|---|------------|--|---|
| <b>Knowledge Rich approach / Knowledge organisers &amp; gamification</b> | H, I, J, K | Subject leaders plan for sequenced, progressive knowledge in their subjects. This is explicit and detailed. Knowledge organisers and gamification support a focus on acquiring knowledge in the long term through cognitive strategies.  | Teachers have a full understanding of the clear knowledge expected to be learnt. They understand what prior knowledge is required and what knowledge will follow. Children build knowledge upon knowledge, developing schema in the long-term memory thus freeing up working memory to support greater engagement in new learning. 90% of Medium term overviews are in line with expectations. Where they are not, subject leaders are clear on the next steps to ensure quality is assured. | Teachers need to be very clear on what knowledge is to be taught to support acquisition of knowledge for pupils. Development of schema frees up working memory so that children can access new learning more readily (cognitive load). For disadvantaged pupils, schema are typically less developed due to lack of rich conversation, sharing of books, experiences – eg trips. | <ul style="list-style-type: none"> <li>Curriculum Policy: Knowledge - <ul style="list-style-type: none"> <li>provides a driving, underpinning philosophy</li> <li>content is specified in detail</li> <li>is taught to be remembered, not merely encountered</li> <li>is sequenced and mapped deliberately and coherently</li> </ul> </li> <li>Sequence Overviews</li> <li>Medium Term Overviews</li> </ul> | AHT<br>LLT | Curriculum plans <ul style="list-style-type: none"> <li>Medium term overview</li> <li>Knowledge organisers</li> </ul> Implementation – Quality Assurance KAD<br>Subject leader review meetings | AHT – curriculum, teaching and learning lead<br><br>Middle leader quality assurance and coaching.<br><br>Staff library<br><br>Gamification programmes |
| <b>Cognition</b>   | H, I, J, K | Implement an evidence-based approach to teaching and learning focusing on cognition - Cognition is the mental process involved in knowing, understanding, and learning. Cognitive strategies are skills like memorisation techniques or subject-specific strategies like methods to solve problems in maths. Cognitive strategies are fundamental to learning and are the ‘bread and butter’ of effective teaching | Cognition (memory) is embedded in practice. All children, particularly PP improve knowledge acquisition and the development of schema, thus freeing working memory to progress in learning more quickly. Teaching is at least in line with expectations set in 85% of classes. Where support is required, coaching programmes including ‘securing expected outcomes’ resulting in improving practice.  | <a href="#">Cognitive science</a> research-based strategies identified: dual-coding, interleaving, spaced practice, retrieval practice.<br><a href="#">EEF</a><br><br>There is evidence-based research that disadvantaged pupils have less working memory capacity resulting in cognitive overload.<br><a href="#">Closing the Attainment Gap</a>                                | <ul style="list-style-type: none"> <li>Teaching and learning policy development.</li> <li>CPD</li> <li>Coaching</li> <li>Quality assurance including coaching support</li> <li>Evidence gathering and sharing of exemplary practice</li> <li>An ethos of attainment for all pupils – high aspirations and expectations for all. An unerring focus on high-quality teaching</li> </ul>                       | AHT<br>LLT | Curriculum planning<br><br>Implementation – Quality Assurance KAD  | AHT – curriculum, teaching and learning lead<br><br>Middle leader quality assurance and coaching.<br><br>Staff library                                |

| Strategy                                   | Barrier    | Detail   | Desired Outcome   | Evidence base and rationale   | Ensuring quality implementation   | Lead       | Evidence   | Expenditure Considerations   |
|--|------------|--|---|---|---|------------|--|--|
| <b>Metacognition &amp; Self-Regulation</b> | H, I, J, K | Implement an evidence-based approach to teaching and learning focusing on metacognition and self-regulation. Metacognition refers to the ways in which pupils monitor and purposefully direct their thinking and learning. Metacognitive strategies are strategies we use to monitor or control our cognition, such as checking whether our approach to solving a mathematics problem worked or considering which cognitive strategy is the best fit for a task. The metacognitive cycle of 'planning, monitoring, review' drawing on knowledge of self, task and strategies is core to this approach. | Metacognition & self-regulation are embedded in practice<br>PP children's metacognitive and self-regulation skills develop, leading to greater independence, engagement and management of their own learning.<br><br>Teaching is at least in line with expectations set for metacognition and self-regulation in 85% of classes. Where support is required, coaching programmes including 'securing expected outcomes' resulting in improving practice.   | Evidence suggests the use of ' <a href="#">metacognitive strategies</a> ' – can be worth the equivalent of an additional +7 months' progress when used well. The potential impact of these approaches is very high, particularly for disadvantaged pupils (EEF)   | <ul style="list-style-type: none"> <li>Teaching and learning policy development.</li> <li>CPD</li> <li>Quality assurance including coaching support</li> <li>Evidence gathering and sharing of exemplary practice</li> <li>An ethos of attainment for all pupils – high aspirations and expectations for all. An unerring focus on high-quality teaching</li> </ul> | AHT<br>LLT | Curriculum planning<br><br>Implementation – Quality Assurance<br>KAD | AHT – curriculum, teaching and learning lead<br><br>Middle leader quality assurance and coaching.<br><br>Staff library |
| <b>Explicit Teaching</b>                   | H, I, J, K | Implement an evidence-based approach to teaching and learning focusing on explicit teaching / instruction. Explicit instruction refers to a range of teacher-led approaches focused on teacher demonstration followed by guided practice and independent practice. One popular approach to explicit instruction is Rosenshine's 'Principles of Instruction' - ten key principles, which he argued underpin any effective approach to instruction in lessons.   | Explicit teaching (Rosenhine Principles) and 'I do, We do, You do' is embedded in practice.<br>Teachers are seen as the expert learner in the classroom. They impart good subject knowledge, giving children 'more to think with' (Dylan Wiliam).<br>Children become more 'expert' as a result of explicit teaching – moving from instruction, through guided practice, to independence.<br>Embedding knowledge in the long-term memory frees up working memory.<br>Teaching is at least in line with expectations set for explicit teaching in 85% of classes. | Several reviews of the research on effective support for pupils in mathematics and reading have provided support for explicit instruction.<br><a href="#">Identified by EEF in their tiered approach model.</a><br><a href="#">Why Minimal Guidance During Instruction Does Not Work – Sweller &amp; Kirschner</a><br><a href="#">Rosenhine's Principles of Instruction</a> | <ul style="list-style-type: none"> <li>Teaching and learning policy development.</li> <li>CPD</li> <li>Quality assurance including coaching support</li> <li>Evidence gathering and sharing of exemplary practice</li> <li>An ethos of attainment for all pupils – high aspirations and expectations for all. |                                     |                   |  | Where support is required, coaching programmes including 'securing expected outcomes' resulting in improving practice.  |   |   |                           |  |  |
| <b>Scaffolding</b>                  | H, I, J, K        | Implement an evidence-based approach to teaching and learning focusing on scaffolding. 'Scaffolding' is a metaphor for temporary support that is removed when it is no longer required. Initially, a teacher would provide enough support so that pupils can successfully complete tasks that they could not do independently. This requires effective assessment to gain a precise understanding of the pupil's current capabilities. Support could be visual, verbal, or written. The teacher will gradually remove the support (the scaffold) as the pupil becomes able to complete the task independently. | Children, especially disadvantaged, are able to access high level work, through scaffolding, without the need for overly differentiating down. Children are supported to take an active role in their learning. Children develop increasing independence. The overwhelming majority of the class are able to access the core learning. Children's metacognitive and self-regulation skills develop. | <a href="#">Identified by EEF in their tiered approach model.</a><br><a href="#">EEF evidence based strategies</a><br>In the past, differentiation could create a ceiling on children's learning. For disadvantaged children, where reduced knowledge acquisition and resulting cognitive overload hampered children's access to the learning, scaffolding has been identified as a strategy to support them in accessing higher levels of learning.  | <ul style="list-style-type: none"> <li>Teaching and learning policy development.</li> <li>CPD</li> <li>Quality assurance including coaching support</li> <li>Evidence gathering and sharing of exemplary practice</li> <li>An ethos of attainment for all pupils – high aspirations and expectations for all. |                          |            |   |  | however, expected to be some impact for all classes in years 3 & 6 t – not only an impact on results, but the ability to focus even more closely on PP children due to reduction in workload and competing need within a class (particularly where need has increased as a result of COVID lockdown).   |   |            |  |  |
| <b>Flexible Grouping</b> | H, I, J, K | Implement an evidence-based approach to teaching and learning focusing on flexible grouping. Flexible grouping describes when pupils are allocated to smaller groups based on the individual needs that they currently share with other pupils. Such groups can be formed for an explicit purpose and disbanded when that purpose is met. It may be that a small group of pupils share the need for more explicit instruction to independently carry out a skill, remember a fact, or understand a concept. Allocating pupils to temporary groups can also allow teachers to set up opportunities for collaborative learning. | Teachers respond to needs arising in lessons (responsive teaching) to maximising progress for children, ensuring <ul style="list-style-type: none"> <li>Support is provided where required</li> <li>Children progress rapidly where appropriate without being constrained to set group / task</li> </ul> | <a href="#">Identified by EEF in their tiered approach model.</a><br>Disadvantaged children are typically behind their non-disadvantaged peers. This gap has widened as a result of COVID19. Flexible grouping removes the stigma of being assigned to a 'lower ability' group and allows a fluid approach to learning; supporting children where required and promoting independence as appropriate. | <ul style="list-style-type: none"> <li>Teaching and learning policy development.</li> <li>CPD</li> <li>Quality assurance including coaching support</li> <li>Evidence gathering and sharing of exemplary practice</li> <li>An ethos of attainment for all pupils – high aspirations and expectations for all. |---------------------------------|---------|---|---|--|--|------------|--|----------------------------|
| <b>School Improvement Model</b> | A-K     | The school improvement model is central to optimising progress for individuals, uniting academic and pastoral staff in focusing on progress for individuals – with PP children a central priority. The core model focuses initially on individual children and the leadership focus will set out to identify aspects that could be responsible for lower than expected performance that, if tackled successfully, would secure accelerated achievement. As part of that individual review, patterns and trends will come to the notice of leaders that impact on multiple children. The patterns and trends will be based on a combination of data analysis, book scrutiny, lesson observation, pupil discussion. Once the patterns and trends have been established, beyond reasonable doubt, consideration must be given to the footprint of the pattern and trend. Further quality assurance may be required to determine the drivers, although these may be, multi-faceted and complex. | <ul style="list-style-type: none"> <li>• Maintain an active and relentless focus on outcomes for children – each child, each group, each term, each year</li> <li>• Accept that it is our collective responsibility to improve outcomes for children despite a wide range of factors that will undermine our efforts and test our patience to the limit e.g.time, resource, previous learning outcomes.</li> <li>• Ensure pupil premium children remain a core focus for ensuring good progress.</li> <li>• Individual leaders accept their individual responsibility to secure good outcomes for children – as such they will lead with autonomy, consistently hold others to account for outcomes secured and compliance with subject and area policy guidance, making and owning their own decisions aligned to the developing practice and priorities at Chesswood. As a result, they will fully commit to securing successful change and consistent practice across the whole school.</li> </ul> | When the school's main focus was on groups / sub-group achievement<br>A team approach to identifying the needs of individual pupils supports a diagnostic approach to assessment. The review identifies areas of concern, beyond academic, to support staff in mitigating against barriers to learning.<br>Starting from where the child is at is the best way to ensure progress. | <ul style="list-style-type: none"> <li>• Data Analysis &amp; School Improvement Models &amp; Executive Summary Guidance.</li> <li>• LLT Meetings</li> <li>• Pupil Progress Meetings</li> <li>• Quality Assurance Policy</li> <li>• Performance management</li> </ul> | SLT<br>LLT | <ul style="list-style-type: none"> <li>• Achievement reports</li> <li>• Pupil Reports</li> <li>• Priority children</li> <li>• Pupil Progress meeting minutes</li> <li>• Quality Assurance</li> </ul> | N/A                        |

|---------------------------|------------------|--|--|---|--|------------------------|--|---|
| <b>Tutorial Programme</b> | F, H, I, J, K    | Class teachers select small groups of mainly pupil premium children from their class (where the number of PP children is very small in the class – 1-6; a teacher may include other children within the support). Each intervention programme will last for half a term – usually 5-6 sessions of 40 minutes. The group size is typically 4-6 children. The class teacher will record children's progress against specific individual objectives over the course of the intervention leading to an impact judgement of the intervention for each child. The impact judgement is recorded by teachers each half term. | Pupils in tutorial sessions make accelerated progress, supporting them in meeting their target estimates. The impact of tutorials are judged as significant or very significant for the overwhelming majority of children ( <a href="#">consistent teacher judgements document</a> ).  | The class teacher is best placed to deliver targeted support intervention in their class due to relationship, knowledge of the pupil, the ability to link the learning to in class learning and accountability. This model allows for teachers to lead the intervention whilst ensuring provision can be given to mitigate the loss of PE and music curriculum through specialist teachers leading clubs in these areas for those who have missed the curriculum time. <a href="#">EEF small group tuition</a> states that small group tuition is effective and that 'Once group size increases above six or seven there is a noticeable reduction in effectiveness.' | <ul style="list-style-type: none"> <li>Tutorial guidance document</li> <li>Termly data review supports identification of target children</li> <li>Pupil progress meetings support teachers in developing strategies to support individuals</li> <li>Year leader support in tutorial design</li> <li>Quality Assurance</li> </ul> | AHT<br>LLT<br>Teachers | <ul style="list-style-type: none"> <li>Quality assurance</li> <li>Termly reports – tutorial impact</li> </ul>                          | Specialist teaching<br><br>Music 1.0<br>P.E 0.6                       |
| <b>Homework</b>           | B, H, I, J, K, L | Homework is set weekly and focuses mainly on core skills – reading, spelling, grammar and maths tables and written methods. Homework is largely completed through online apps – eg IXL & TT Rockstars. Due to declining submission rates, homework is being reviewed to seek greater engagement and impact.  | Completion of homework is a priority to the overwhelming majority of children and families. Homework supports knowledge and skill development, leading to accelerated progress. Homework meets the needs of individual pupils, focusing on their learning needs and gaps. Homework extends and supports the high-quality learning experiences from school. Homework activities are directly related to the school curriculum and are seen by | Submission of homework has declined for all. For pupil premium children, they are 3 x more likely to rarely or never submit homework. The EEF toolkit reports low impact of homework in primary schools. However, it also reports that schools whose pupils do homework tend to be more successful. There is some evidence that when homework is used as focused intervention, it can be effective in improving student's attainment for primary pupils. Therefore, the review of homework will look  | <ul style="list-style-type: none"> <li>Homework review outcomes</li> <li>Homework policy</li> <li>Teacher tracking and reporting on submission</li> <li>Supporting interventions <ul style="list-style-type: none"> <li>Homework club – PP target</li> </ul> </li> </ul> Home iPad use for PP children                           | AHT<br>LLT             | <ul style="list-style-type: none"> <li>Termly report <ul style="list-style-type: none"> <li>Homework submission</li> </ul> </li> </ul> | Potential additional programmes for more bespoke support – eg MyMaths |

|------------------------------------|------------------|--|---|--|--|-----------------------------|--|---|
| Home-learning – technology support | B, F, H, J, K, L | To support disadvantaged pupils learning from home, iPads will be provided for individual use. To maintain an iPad, targets will be set around homework completion. Parents will be required to sign a contract for the use – agreeing to the terms set out. Children will also sign a contract regarding its use, agreeing to meet the home-learning targets set by the teacher.  | The overwhelming majority of disadvantaged pupils identified for a home iPad will increase their homework completion. At least 75% of children targeted will increase homework submission to at least 'Mostly' – <a href="#">consistent teacher judgements 21</a> | PP children are 2x as likely to submit homework less than 'Mostly'. They are 3 times more likely to submit homework never or rarely. Ensuring homework is more targeted (intervention) than being set in a blanket fashion will support the impact.  | <ul style="list-style-type: none"> <li>Homework policy</li> <li>Termly teacher judgements</li> <li>Pupil progress meetings</li> <li>Pupil contracts &amp; target setting</li> </ul>  | DHT<br>LLT<br>IT<br>Manager | <ul style="list-style-type: none"> <li>Termly report <ul style="list-style-type: none"> <li>Homework submission</li> </ul> </li> </ul>   | iPad insurance / repair and maintenance |
| Year 6 high support class          | E, I, J          | 16 children from Y6 have been selected based on need to join a class with very high levels of support – one teacher and two teaching assistants. This has reduced the number of children within the remaining five Y6 classes. Children are targeted on academic need and not behaviour. As PP children are disproportionately within SEN, there is typically a higher representation of PP in the class than across the school – current proportion is 38% PP | <ul style="list-style-type: none"> <li>To develop independence and confidence in preparation for secondary school</li> <li>To accelerate progress</li> <li>To develop close friendships / social skills in a nurturing environment</li> </ul>                     | <a href="#">EEF Reducing class size</a> . For significant impact, class sizes need to be reduced to fewer than 20 or even 15 pupils. <i>'Overall, the evidence does not show particularly large or clear effects, until class size is reduced substantially.'</i> There is expected to be impact for other classes in year 6 too – not only through a slight reduction in size (minimal impact) but also through the reduction in high need which takes significant teacher / TA time. | <ul style="list-style-type: none"> <li>High quality teaching – ensuring a teacher capable of adapting planning and learning to support individuals</li> <li>SENCO support</li> <li>High levels of TA support</li> <li>Quality Assurance</li> </ul> | SENCO<br>Y6 Lead            | <ul style="list-style-type: none"> <li>Termly achievement reports <ul style="list-style-type: none"> <li>Target acquisition</li> </ul> </li> <li>Quality Assurance</li> <li>SEN review meetings – including parent voice</li> <li>Playground observation – scaling record</li> </ul> | Teacher x 1.0<br>SEN allowance          |
| Reading for All                    | B, F, H          | Targeting the lowest 20% of readers based on standardised score – disproportionately representing PP children. We also help to support PP children with reading by giving them targeted support in choosing books that are within their zpd, assisting them with selecting books, coaching   | Pupils selected for reading for all make accelerated progress. They will have an increased engagement with reading, and an increased awareness of choosing appropriate books, both in terms of subject matter and challenge of the text.                          | EEF guidance recommends that KS2 children are supported to develop fluent reading capabilities and are taught reading comprehension strategies through modelling and supported practice, which this approach achieves.   | <ul style="list-style-type: none"> <li>Clear guidance</li> <li>Teacher oversight <ul style="list-style-type: none"> <li>Clear targets</li> <li>Appropriate levels</li> <li>High quality texts</li> </ul> </li> </ul>                               | English<br>Leads<br>LLT     | <ul style="list-style-type: none"> <li>AR Word count</li> <li>Quiz success</li> <li>Target Acquisition</li> </ul>  | Targeted book purchase                  |

|---|---------|--|---|--|---|----------|--|----------------------------|
|   |         | them on reading through 1 to 1 reading with an adult and coaching them on comprehension when taking AR quizzes. To support this, we purchased 33 books with a zpd between 0.8 and 2.0 to help provide rich, engaging texts for the children. After the huge success of this, a further 49 books ranging between 0.5 and 2.4 were purchased to further support these children with their engagement in reading.             |   |  |   |          |  |                            |
| <b>Accelerated Reader – Pupil Premium Wordcount</b> | B, F, H | To support engagement, monthly review of AR data is sent out to staff. This focuses on word count for individuals, classes and pupil premium as a group. This makes teachers acutely aware of the progress of children and supports them in targeting encouragement and support. The work count of pupil premium (average) against the rest of a year group (average) supports teachers and leaders in monitoring the gap. | <ul style="list-style-type: none"> <li>The reading gap is closed (word count) between PP and non-PP children <ul style="list-style-type: none"> <li>The higher proportion of SEN represented will affect this, but the trend needs to be one of closing the gap</li> </ul> </li> <li>PP children read for pleasure, selecting books at appropriate levels</li> <li>PP children have high success rates of quiz completion (75%+)</li> </ul> | Typically, pupil premium children read significantly less than non-pupil premium. This has been recorded as low as 40%. Ensuring teachers are aware of this, with regular reminders encourages are clear focus on closing the gap and targeting children for intervention. The element of competition between classes also supports an increase in reading volume. | <ul style="list-style-type: none"> <li>Monthly AR word count report circulated</li> <li>Pupil progress meetings</li> <li>Target setting</li> <li>Quiz check</li> <li>Quality book purchase</li> <li>Book packs</li> </ul> | Eng Team | <ul style="list-style-type: none"> <li>Pupil Premium word count tracking</li> <li>Termly achievement report</li> </ul> | English leader oversight   |

|----------------|---------|--|--|--|---------------------------------|-------------------|----------|----------------------------|
| <b>Numbots</b> | E, H, J | Within Maths, we support children with PP by using Numbots to help accelerate their progress and close the gap with meeting ARE. This program targets number fluency and basic mental addition and subtraction – skills which often undermine children’s confidence and progress. We also use TT Rock Stars to initially help children to learn their times tables, and then become more fluent with quick recall. Both of these are celebrated through weekly Top 10s, certificates and the awarding of badges for achievement. | Pupils selected will make accelerated progress in Maths. They will improve performance on questions categorised as Number and Operations on the termly PUMA assessments. | Pupils with gaps in their place value knowledge are less confident within Maths lessons and perform less well on these categories in termly tests. An engaging, little and often approach is required to help plug these gaps without impacting negatively on current coverage within Maths lessons. It is important that interventions motivate pupils, as identified in the EEF guidance into improving Mathematics in Key Stage 2 and 3. There is an increased focus on this within Y3 and a lower benchmark for children to engage with this compared to further up the school as early starts for interventions are recommended by the EEF within the aforementioned guidance. As stated in the EEF guidance into effective use of Digital Technology, this technology can play a role improving assessment and feedback – it does this by providing children with instant feedback on their questions and allowing teachers to track pupil performance including identifying tricky areas for children, which may require further support. |                                 | Maths Lead<br>LLT |          | Maths lead oversight       |

|---|---------------|---|---|---|---|-------------------------------------|---|--|
| <b>Club attendance – PP targeting and priority places</b> | A, D, H, L    | A wide range of quality clubs are provided by specialist teachers in music and P.E. Pupil Premium children are given priority access to sports and music clubs. Provision of high quality clubs in PE and music mitigate for children missing these subjects through tutorial support. Teachers (including specialist) target pupils for club attendance. Where external providers deliver clubs, free places for PP children are sought as part of the agreement. School provided clubs will be charged for from Autumn Term 2021. | The overwhelming majority of disadvantaged pupils attend at least one club. Children fully engaged with school and all aspects of school life developing a sense of belonging – especially for disadvantaged. Identified gifts and talents given opportunities to shine – increasing confidence and widening life opportunities.  | After-school clubs can improve the academic performance and social skills of children from disadvantaged backgrounds, research shows.<br><a href="#">The study of 6,400 children</a> in England found that those who took part in organised sports and physical activities at the ages of five, seven and 11 were almost one and a half times more likely to reach a higher than expected level in their Key Stage 2 (KS2) maths test at the age of 11.<br>Disadvantaged children who attended after-school clubs also fared better than their peers who did not take part. | <ul style="list-style-type: none"> <li>• Use of specialist teachers supports high quality provision</li> <li>• Targeting of PP children attending tutorial given priority access</li> <li>• Pastoral lead oversight</li> </ul>  | Pastoral LLT<br>Specialist teachers | <ul style="list-style-type: none"> <li>• Club attendance</li> <li>• PP engagement in clubs</li> </ul>   | Specialist teacher salaries – already calculated.<br>Free spaces for PP children at clubs. |
| <b>Promoting gift and talent – music and sport</b>        | A, C, D, H, L | Specialist teachers (P.E. and music) seek out talented pupils (with a key focus on pupil premium) – supporting them in developing their talents through clubs, tuition and performances. (Although some music and PE will be missed during the course of the year, specialist teachers have a key focus on promoting their subjects for pupil premium children, resulting in a wide range of opportunities – eg music and sports clubs / performances / including external opportunities.)  | <ul style="list-style-type: none"> <li>• Overwhelming majority of disadvantaged children fully engaged with school and all aspects of school life.</li> <li>• Identified gifts and talents given opportunities to shine – increasing confidence and widening life opportunities.</li> <li>• Specialist music and PE leaders are especially ambitious for disadvantaged pupils.</li> </ul> | <a href="#">The impact of physical education and sport on education outcomes</a> includes: achievement, cognitive function, behaviour, social, attendance.<br>While music touches the lives of all young people, the disadvantaged can benefit most. Music helps bind pupils into the wider life of the school.<br><a href="#">The importance of music.</a><br>Risk factors identified by the <a href="#">Research to understand successful approaches to supporting the most academically able disadvantaged pupils</a> include  | <ul style="list-style-type: none"> <li>• Core focus of specialist teachers <ul style="list-style-type: none"> <li>○ Music</li> <li>○ Sport</li> </ul> </li> <li>• Termly reports supports knowledge of pupils.</li> <li>• Emphasis on strong relationships – academic and pastoral staff supports identification</li> <li>• Pupil progress meetings support identifying talent and interests</li> </ul> | Specialist Teachers<br>DHT<br>AHT   | Specialist teachers accounting for PP children <ul style="list-style-type: none"> <li>• Pupil leaders</li> <li>• Performances</li> <li>• Representing school</li> </ul> | Specialist teacher – extra-curricular time (already accounted for)                         |

|                   |         |  |  | <ul style="list-style-type: none"> <li>no or limited experience of cultural activities (theatre, art galleries, music, dance)</li> <li>no or limited experience of belonging to out of school clubs or community associations, activities</li> <li>Affected by deprivation in community environment (rural/urban/city), e.g.</li> <li>limited amenities (e.g. theatres, art galleries, sports facilities, libraries, youth organisations)</li> </ul>  |   |                      |  |                            |
| <b>School Dog</b> | A, C, L | A school dog has been introduced into school following lockdown 2021. He is available to support children with social and emotional needs – based with the pastoral team as resource to engage children in school life. This includes addressing a wide range of the barriers to learning above. | <ul style="list-style-type: none"> <li>A greater enjoyment of being in the school environment, improved attendance and a greater willingness to learn and participate.</li> <li>Improved behaviour, social interaction and sense of responsibility in the classroom.</li> <li>Increased knowledge of dogs and how to behave safely and appropriately around them.</li> <li>Pupils increase in confidence.</li> <li>They gain a better understanding of how to take responsibility for another living being. This, potentially, gives them better recognition of their own responsibilities.</li> </ul> | <p>According to <a href="#">research</a>, full-time school-based dogs can contribute significantly to a positive environment as well as have a positive impact on children and young people's social and emotional development, behaviour and enthusiasm towards academia.</p> <p>The school context report identifies these areas of barriers to learning. <a href="#">Dogs for good</a> also highlight the positive impact of a community dog in schools – including attendance, behaviour, responsibility, engagement.</p> | <ul style="list-style-type: none"> <li>Guidance and risk assessment</li> <li>Whole school community engagement – through communication</li> </ul> | AHT<br>Pastoral Team | <ul style="list-style-type: none"> <li>Pastoral journey</li> <li>Qualitative evidence</li> <li>Case studies</li> </ul> | Insurance                  |

| Strategy  | Barrier | Detail   | Desired Outcome  | Evidence base and rationale  | Ensuring quality implementation  | Lead                          | Evidence   | Expenditure Considerations           |
|---|---------|--|--|--|--|-------------------------------|--|--------------------------------------|
| <b>Specialist PE and Music Provision</b>                          | I, L    | All children benefit from high quality provision in music and PE. This also supports the tutorial provision and delivery of high quality after school clubs – allowing the class teacher to deliver intervention whilst not missing core subject time. The quality of provision and extra-curricular provision mitigates against the loss of curriculum time. With specialist teaching, we are able to provide significant opportunities for performance and competition. Eg musical theatre, choir performances, multiple sports events and competitions. | <ul style="list-style-type: none"> <li>High quality PE and music provision is outstanding – supporting a broad and balanced curriculum</li> <li>PP children have a wide range of opportunities gaining confidence through performance and competition</li> <li>Achievement in specialist subjects is outstanding – higher proportions at ARE and GDS than other foundation subjects</li> </ul> | The overall impact of sports participation on academic achievement tends to be positive but low (about two additional months' progress).   | <ul style="list-style-type: none"> <li>Appointing specialist subject leads</li> <li>Job description – adjusting role to provide time for extra-curricular role</li> <li>Quality Assurance</li> </ul> | AHT<br>DHT                    | <ul style="list-style-type: none"> <li>Quality assurance</li> <li>Achievement in PE &amp; Music</li> </ul>                     | Specialist teaching – already costed |
| <b>Computing extra-curricular opportunities - Virtual Reality</b> | A, J, L | PP children will be prioritised for extra-curricular enrichment. School has invested in significant IT and will use this to provide enriched experiences for children. Virtual Reality headsets will be used to enable children to virtually travel to areas of interest around the world – thus developing children's knowledge and 'experience' of the world. Virtual visits to museums and galleries will increase cultural experiences.  | <ul style="list-style-type: none"> <li>Extra-curricular experiences mitigate against risk factors identified for disadvantaged pupils.</li> <li>Engagement in school increases due to the enriched experiences provided</li> </ul>   | Typically, disadvantaged children will have less developed knowledge and schema due to access to books, rich conversation, trips and experiences of the wider world. Risk factors identified by the <a href="#">Research to understand successful approaches to supporting the most academically able disadvantaged pupils</a> include <ul style="list-style-type: none"> <li>lack of parental support for educational success at home (may be a lack of understanding of how to do this)</li> </ul> | <ul style="list-style-type: none"> <li>High quality equipment purchased – VRclassroom</li> <li>IT Manager supervision</li> </ul>   | DHT<br>Pastoral<br>IT Manager | <ul style="list-style-type: none"> <li>Termly reports – engagement and behaviour.</li> <li>Targeted club attendance</li> </ul> | VR Classroom set                     |

| Strategy   | Barrier | Detail   | Desired Outcome   | Evidence base and rationale  | Ensuring quality implementation  | Lead                   | Evidence  | Expenditure Considerations   |
