

A sudden puff of glittering smoke (pages 10–11)

- 1 a) 1 mark – *rings around a planet*
b) 1 mark – It creates an image of how the mist swirled around Jeanie, in the same way as rings circle a planet, something which may be more familiar to the reader.
- 2 2 marks – 1 mark each for two of the following: *The genie shut his eyes till his dark lashes fluttered on his cheeks. / He blew and blew. / But the genie still blew. / The glittering rings still circled round her head.*
- 3 2 marks for developed answer: Mr Piper's eyes widened and his mouth dropped open which means he could not believe what he was hearing. / He said to Jeanie that he thought she *must have spent the whole weekend locked in the library, to know so much.* / He may not have thought that Jeanie was capable of knowing such information as this. 1 mark for undeveloped points such as: *His mouth dropped. / He didn't think Jeannie knew much. / He thought she'd been to the library.*
- 4 1 mark – *In the good old days*
- 5 1 mark – To throw the heat back: *whitewash reflects heat so it is like saying it threw/bounced/reflected it straight back.*
