

ACRO in Action

Job Profile

Job Title: Computer Scientist

Job Profile: Computer scientists use technology to solve problems. They write software to make computers do new things or accomplish tasks more efficiently. They create applications for mobile devices, develop websites, and program software.

Important Subjects: Computing, Maths, English

Mark Zuckerberg

Key Skills

A ttitude	Determination: Being positive and never giving up. Computer scientists are always coming up against code that might have bugs which stop it from working. They keep going until they can debug it.
C reativity	Ideas Generation: To be able to design and make a system, platform or game using code needs a lot of creativity. Computer scientists need creativity to develop new and efficient software. This is what Mark Zuckerberg used to create Facebook.
R elationships	Working with Others: Computer scientists must work well in a team of people. This might be with other coders, designers or customers wanting to buy the product. No computer scientist can achieve this without teamwork.
O rganisation	Planning: A computer scientist needs to be organised and will work to strict deadlines in order to deliver the project that they are working on by a certain timeframe. This is really important to keep customers happy and to ensure that their software is available as advertised.

What I love about my job: Computer scientists like solving problems, overcoming challenges, creating something new and exciting, as well as playing with computers all day!
