1) Two friends are discussing a maths question. Anita Patricia $\frac{2}{5}$ of £35 is £14. $\frac{2}{5}$ of £35 is £7. Who is correct? Use reasoning to explain your answer. 2) Luke If the minute hand moves $\frac{5}{6}$ of the way round the clock face from where it is now, 55 minutes will have passed. Do you agree? Use reasoning to explain your answer. 3) Give two examples to prove that Jusuf is incorrect. Jusuf I can't calculate $\frac{1}{7}$ of any number because the denominator is odd.
