

### Teacher notes:

Children are going to be making a board game over two lessons.

Use the flip as a rough guide of what they are going to need to do but it may take classes different times to complete each section.

#### They need to:

- Choose their topic
- Choose the game template
- Create questions and answers for the topic.
- Put questions on games
- Play games
- Review it.

WALT: Create a maths board game

Today we are going to design and create a board game. Next lesson, we are going to play them

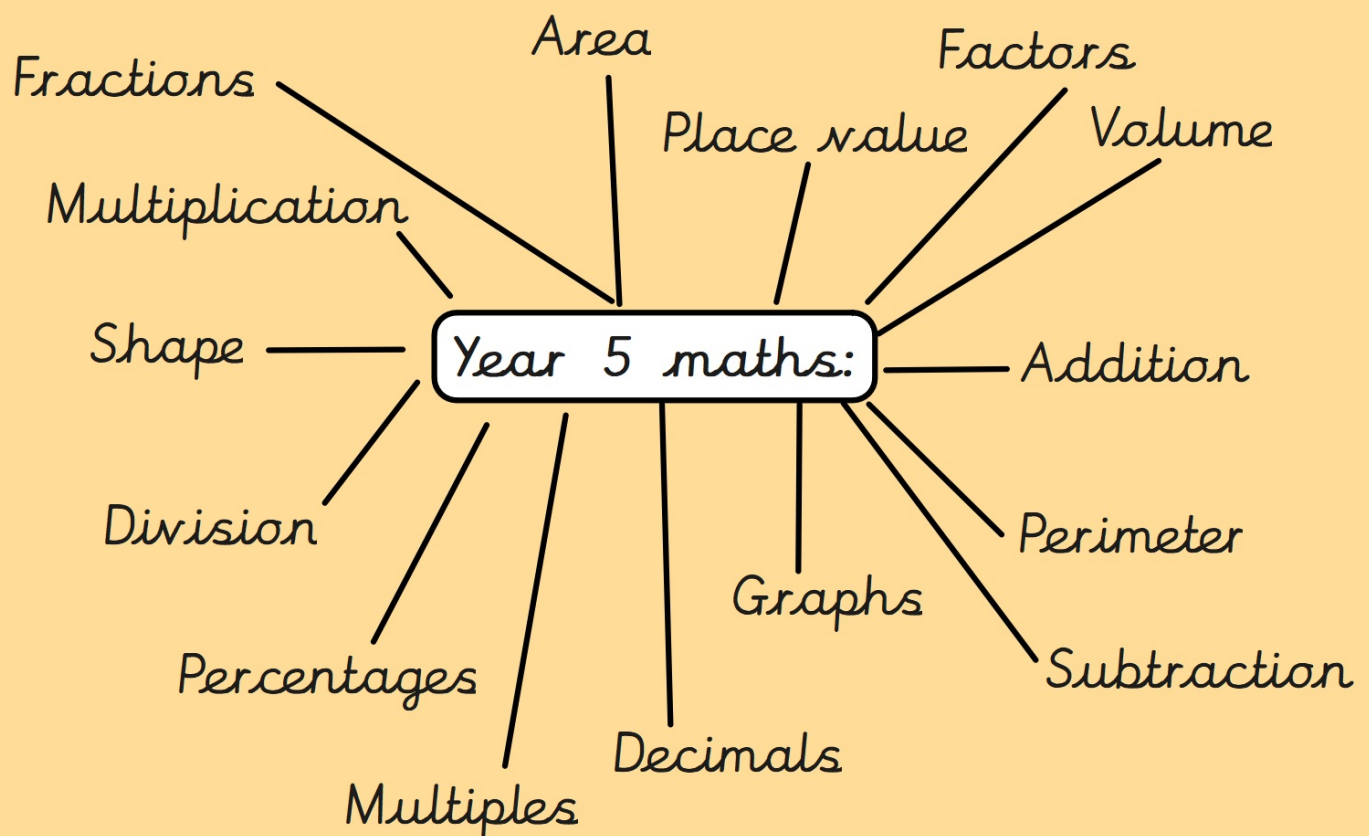

WALT: Create a maths board game

What maths topics have we looked at this year?

Year 5 maths:

## WALT: Create a maths board game

What maths topics have we looked at this year?

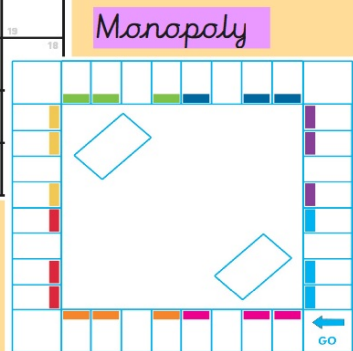

## WALT: Create a maths board game

You now need to think of what topic(s) you are going to choose for your game.

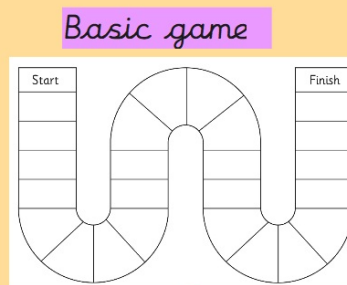

Once you have finished thinking of your topic, you can have a look at the game templates.

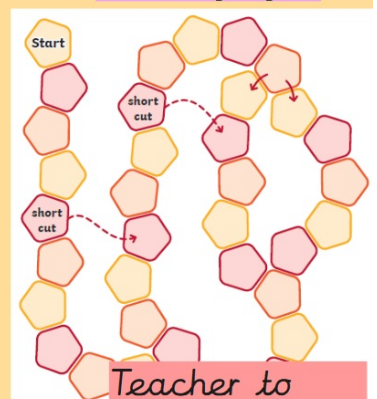

Snakes and ladders

Monopoly

Basic game

Game of life

Teacher to talk through each game

## WALT: Create a maths board game

Once you have thought of your topic and template for your game, you need to think about:

- How many people are going to play your game at one time?
- How does the players win?
- Are there any consequences to the game?

## WALT: Create a maths board game

You now need to write all the questions into your book. You also need to write answers as your game is going to come with answers.

Once you have finished, you need to get your partner to check your answers before you write them onto your game board.

WALT: Create a maths board game

You can now play each others board games.

After you have played a board game, you need to write some positive and one thing that the game could improve on a post-it.
