

I can solve problems using multiples of 50			
I can count in 50s.			
I can identify missing multiples of 50			
With support, I can count in 50s			

WALT count in multiples of 50

Fill in the missing gaps:

a) 50 100 150 200 250 300

b) 350 300 250 200 150 100

c) 450 500 550 600 650 700

Explain how knowing the 5 x table can help us to count in 50s:

Counting in 50s

1 How many cards does each person have?

Filip	Eva	Mo	Aisha
100	150	200	250

Teddy has 8 packs of cards.
How many cards does Teddy have?

Teddy has 300 cards.
 $50 + 50 + 50 + 50 + 50 + 50 + 50 + 50 = 400$

2 Complete the number tracks.

200	250	300	350	400	450	500	550
650	700	750	800	850	900	950	1000
750	600	550	500	450	400	350	300

Work checked by Miss Kunna

3 Rosie is counting up in 50s from 0 to 1,000

Circle all the numbers that Rosie will say.

- 505 750 75 350 240 800 950

4 What numbers are the arrows pointing to? Label the arrows.

5 Is this true or false?
These scales will balance.

How do you know?
It is false because one has hundred
