WALT compare 3-digit numbers	
	I know when to use the symbol for greater than, less than and equal to when comparing two 3-digit numbers. I know when to compare the hundreds, tens and ones values.
	I know how to compare two 3-digit numbers using the words greater than, less than and equal to.
	With support, I can compare two 3-digit numbers using the words greater than, less than and equal to.
Nasty Maths	

Question	True	False
$15 > 12$	✓	
$32 > 29$	✓	
$135 < 145$	✓	
$302 > 199$	✓	
$345 = 354$		✓

425 < 525
 425 is less than 525

I know that 12 is less than than 15 because it has 3 more than 12 so it is correct.

I think that i have spotted a pattern because it is going higher and greater.

I knew that 32 is greater or higher than 29 because 32 has 3 tens and 29 has two tens.

4 What is 10 more than each of these?  (p. 238)
