

Geography - Wednesday 13<sup>th</sup> January 2021

### Counties in the South East Region of the UK

Remember when we learnt about our local food supply chain in Geography? We found out that it travels a short distance, through our town (Worthing), county (West Sussex) and the region we live in. Here is a map of our local region, the South East:

**Task 1 - test yourself on the counties in the South East!**

Follow this link to practise locating the counties in the South East.

<https://wordwall.net/resource/5580197/counties-south-east-yr-3-4>

Keep going until you know them all!

**Task 2 - research a county in the South East.**

Pick a county in the South East to research and find out:

- The population
- Three major cities
- Any other interesting facts about the county!

Geography - Wednesday 20<sup>th</sup> January 2021

### Regions in the UK

Remember when we learnt about our national food supply chain in Geography? We found out that it travels a medium distance, through the regions in the UK. Here is a map of the regions in the UK:

Task 1 - test yourself on the regions in the UK

Follow this link to practise locating the regions in the UK.

<https://wordwall.net/resource/5517905/geography/regions-uk-year-3-4>

Keep going until you know them all!

Task 2 - research a region in the UK.

Pick a region in the UK to research and find out:

- The population
- Three counties
- Three major cities
- Any other interesting facts about the region!

### Continents of the World

Remember when we learnt about the global food supply chain in Geography? We found out that it travels a large distance, through the different countries in different continents around the world. We also found out that we import food from different countries because different types of food grow in different climates. Here is a map of the continents of the world:

Task 1 - test yourself on the continents of the world.

Follow this link to practise locating the continents of the world.

<https://online.seterra.com/en/vgp/3004>

Keep going until you know them all!

Task 2 - research a continent of the world.

Pick a continent of the world and find out:

- The population
- What hemisphere the continent is in
- What the climate is like in that continent (think biomes!)
- Any other interesting facts about the continent!

## Countries in Europe

Remember when we learnt about the global food supply chain? We looked at the biggest import of food from different countries in Europe. Here is a map of the countries in Europe:

Task 1 - test yourself on some of the major countries in Europe.

Follow this link to practise locating some of the major countries in Europe:

<https://online.seterra.com/en/xgp/3007?c=X74PM>

Keep going until you know them all!

Task 2 - research a country in Europe.

Pick a country in Europe and find out:

- The population
- The capital city
- What the climate is like in that country (think biomes!)
- Any other interesting facts about the country!

### Countries in South America

Remember when we learnt about the global food supply chain? We looked at the biggest import of food from different countries in South America. Here is a map of the countries in South America. ->

Task 1 - test yourself on some of the major countries in South America.

Follow this link to practise locating some of the major countries in South America:

<https://online.seterra.com/en/xgp/3016?c=TGNLR>

Keep going until you know them all!

Task 2 - research a country in South America.

Pick a country in South America and find out:

- The population
- The capital city
- What the climate is like in that country (think biomes!)
- Any other interesting facts about the country!
