

How many counters do they have?

There are fewer than 30 counters.

If I arrange the counters into groups of 5 there is 1 counter left over.

If I arrange the counters into groups of 8 there are 2 counters left over.

They have 26 counters.

Can you create your own puzzle like this?

Top tip: Pick a number of counters and then make the clues for it.

I wonder if anyone can solve your puzzle.....
